16. A method as claimed in claim 9, characterised in that the output levels of the image variation data of the different camera positions are standardised so as to be mutually comparable, the standardised image variation levels of the different camera positions are compared, and the image data $(2d_1 - 2d_n)$ of the camera position representing the highest-level variation is selected for automatic display.--

REMARKS

This Preliminary Amendment is submitted to change the multiple dependent claims to single dependent claims in order to reduce the government filing fee.
